## LabsByDesign from iWorx. Buy Only the Equipment You Need – No More, No Less.

In today's economy, it's more important than ever that you get the most value from your lab teaching budget. That's why we introduced LabsByDesign. Unlike traditional, all-inclusive lab systems that include

equipment that you may never use, LabsByDesign lets you choose just the right components you need to teach the experiments required by your curriculum – no more, no less. It's a great way to stretch your budget and afford more of the equipment that you really do need.

### Tailor Your Own Physiology Teaching Solution

Choose from more than 150 iWorx professionally authored lab experiments in cardiovascular, respiratory and neuromuscular physiology. We then carefully tailor only the components and courseware you need to teach the

experiments you select. With LabsByDesign, you'll have a lab teaching solution that matches your curriculum perfectly.

And when your curriculum expands, we offer a broad array of data recording hardware, software, sensors, electrodes, stimulators and supporting accessories that are available when you need them.

### Call Us Today!

Let us help you design your own physiology labs  
or visit [www.iworx.com/labsbydesign.htm](http://www.iworx.com/labsbydesign.htm)  
and use our easy Web-based selection guide. You may  
be surprised just how far your lab budget can go.
