
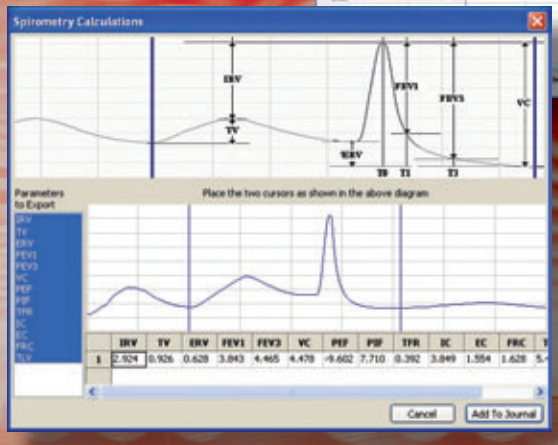
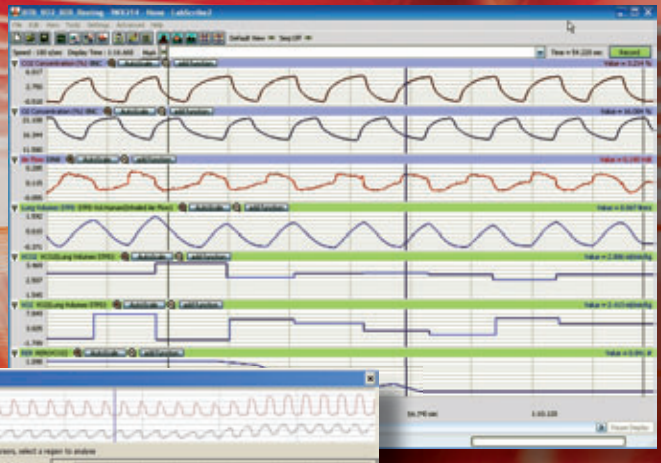
neuromuscular

Neuromuscular studies in vertebrates and invertebrates



metabolic

Metabolic studies – exercising or resting subjects

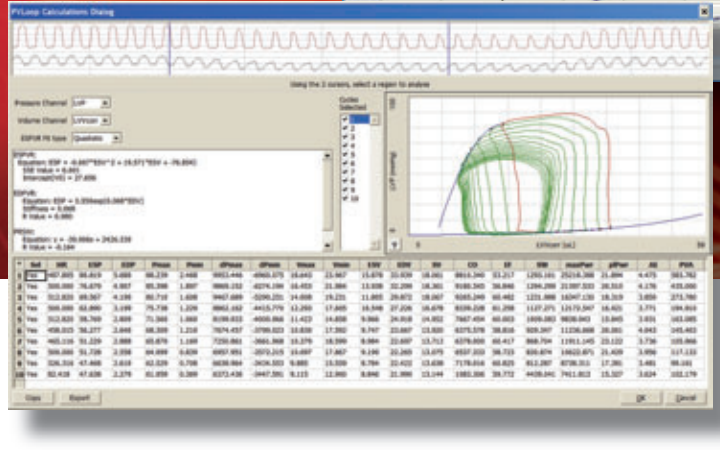


respiratory

Measurements of lung volumes and capacity in resting and exercising subjects

cardiovascular

Pressure-Volume Loop studies in rodents



Optimize Your Research with LabsByDesign™

iWorx exclusive LabsByDesign approach lets you select just the right combination of hardware and software needed to perform advanced cardiovascular, neuromuscular, respiratory and metabolic analyses. With a wide range of high performance multi-channel recorders, transducers, sensors and conditioners combined with versatile LabScribe2™ software, iWorx optimizes each LabsByDesign solution for your unique analytical requirements.

Special offer

Discover how iWorx LabsByDesign solutions can enhance your physiology research while leaving more in your budget than you might expect. Get a 10% discount by simply asking for a LabsByDesign quote. Call toll-free (800) 234-1757 or (603) 742-2492 or email us today at info@iworx.com.
